

Kennicott Students' Next Steps 2020

We are so very proud of the Year 13 community of students that have just left us. Despite a disrupted year in many respects, so many of them have gone on to secure places at top colleges and universities.

Sam Eaton University of Bath

I'm studying a BSc in **Sport and Exercise Science** at the University of Bath. The challenges of online learning are certainly there but being able to live on campus and get to know my housemates has helped with feeling engaged in the new community I'm now a part of. I've also been able to go out and explore the city as well as engaging with sport on campus. The unit I'm most looking forward to is the psychology and just generally being able to further my learning in a field I'm really interested in.

Sam Eaton

Huw Paige Oxford University

I'm studying a BA in **Geography** at the University of Oxford. Oxford terms are shorter than at most other universities, so start slightly later, and we only had a few days upon arriving before lectures and tutorials (small classes for essay discussion) started – which means the last few days have been a bit of a whirlwind trying to get used to a new city, new course, new people and a new way of working all at the same time! My college and the University in general are still adjusting to having students back and whilst there are definitely teething problems (the wifi is, without fail, totally awful) with online classes the workload isn't overwhelming... yet. Everyone's nice and friendly which definitely helps, even the people from Eton!

Huw Paige

Mia Poore Durham University

Mia has gone up to Durham to study a Msc in **Mathematics**. Durham is one of the world's leading universities as shown by their World Top 100 position in the QS World University Rankings 2019, where they were ranked 74th. A record 18 Durham subjects were also in the World Top 100 of the QS World University Rankings by Subject 2019, including 10 in the World Top 50.

Maya Engwell University of Edinburgh

Maya has travelled across the border to read **English Literature** at the University of Edinburgh. Based in the first UNESCO World City of Literature, the faculty is the oldest department of English Literature in the UK; one of the longest established in the world. The University of Edinburgh is one of the world's top universities, consistently ranked in the world top 50* and placed 18th in the 2019 QS World University Rankings.

Iona Ogilvy-Stuart Royal Holloway

Iona has chosen to read Liberal Arts with an International Year at the Royal Holloway, University of London. Her degree is interdisciplinary and will allow Iona to adopt either a concentrated or a broad focus in her studies, as she chooses from a vast range of subjects available across the Arts, Humanities and Social Sciences. In her first year, Iona will also study a language.

Eve Rowse Cardiff Metropolitan

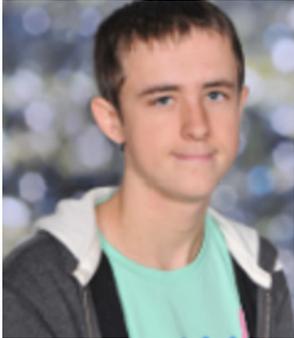

Eve has chosen to go to Cardiff to study Sport, Physical Education and Health. Eve's BSc will focus on the health and wellbeing agenda within physical education, and will equip her with the skills and knowledge that will enable Eve to establish and influence the maintenance of healthy lifestyles in others. Eve was always passionate about coaching her peers and younger students in the college, this course appears tailor-made for her!

Kennicott Students' Next Steps 2020

We are so very proud of the Year 13 community of students that have just left us. Despite a disrupted year in many respects, so many of them have gone on to secure places at top colleges and universities.

Isaac Marles UWE Bristol

Isaac has gone to the wonderful city of Bristol to study Mechanical Engineering, with a foundation year. The course is a new and exciting one which looks to develop an understanding of stress analysis, dynamics, heat transfer, mechatronics, materials and manufacture and, of course, maths. Students are taught in the university's new state-of-the-art facilities. The course has been developed alongside industry partners and features models on both aerospace and automotive engineering in the first year.

Harry Mann Bath University

Harry has chosen Bath University to read Mathematics. Harry will specialise in pure and/or applied mathematics whilst having the option to study units in statistics, computing, physics, and economics. Harry will be able to take advantage of international collaborations and research activities that feed into his undergraduate teaching. In his final year Harry will have the opportunity to use Bath University's high-performance computing facility 'Balena', which can perform over 110 trillion calculations a second

Niall Cashman University of Bath

Niall has gone to Bath to study Mathematical Sciences with a year abroad. Mathematical Sciences combines traditional mathematics with statistics and computing. In the first two years, Niall will explore an introduction to mathematics at university level before choosing areas in which he'd like to specialise in later in the course. Recent employers include Aviva, British Telecom, Deloitte, EY, PwC and Tate & Lyle. A perfect course for Niall!

Estella Carter Briggs Falmouth University

Estella has gone to Falmouth to study Graphic Design. Estella's course is an industry-focused design degree, she'll learn to be an adept visual communicator, developing core skills in typography, branding, visual language, craft and critical thinking. She'll also be able to spend plenty of her weekend's enjoying surfing the Cornish coast. Falmouth must be one of THE best places to study (in our opinion!)

Ella Fraser University of Bristol

Ella has chosen to read Liberal Arts with an International Year at Bristol. This rich and challenging liberal arts programme will allow Ella to explore the arts and humanities while building crucial skills in analysis and communication that will be valuable to her throughout your degree and beyond. In years one and two Ella will take a combination of bespoke core units exploring foundational issues in the arts and a choice of optional units from the full range of disciplines offered in the Faculty of Arts.

Adam Backhouse University of Bristol

Adam has also gone to Bristol to study English and Film. Adam will explore the history of film and television, consider theoretical perspectives, appreciate how films are made and engage in practical film-making activities. Throughout his studies Adam will learn from a range of film and television professionals, and in his final year he will have the chance to undertake a placement in the creative industries.
